## **OVERSEAS REGULATORY ANNOUNCEMENT ANNOUNCEMENT ON THE COMPLETION OF ON-GRID POWER GENERATION IN THE FIRST THREE QUARTERS OF 2022**

### **SPECIAL NOTICE**

The board of directors and all directors of the Company warrant that there are no false representations and misleading statements contained in, or material omissions from this announcement, and severally and jointly accept the responsibility for the truthfulness, accuracy and completeness of the contents of this announcement.

This announcement is made pursuant to Rule 13.10B of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

Datang International Power Generation Co., Ltd. (the “**Company**”) announces that, according to the Company’s preliminary statistics, as of 30 September 2022, the total on-grid power generation of the Company and its subsidiaries amounted to approximately 186.1293 billion kWh, representing a decrease of approximately 4.81% on a year-on-year basis, among which:

<b>Category</b>	<b>On-grid power generation for the first three quarters of 2022 (billion kWh)</b>	<b>Year-on-year change</b>
Coal-fired	139.6349	-5.21%
Gas-fired	10.5302	-14.21%
Hydropower	25.7626	-6.79%
Wind power	8.2864	15.74%
Photovoltaic	1.9151	66.10%
Total	186.1293	-4.81%

The major reasons for the change in on-grid power generation of the Company include:

1. In the first half of the year, power demand in certain regions where the Company's generating units located decreased, and accordingly the Company's on-grid power supply decreased year-on-year. In the third quarter, due to the continuous high temperature in many parts of the country, the power supply and demand in certain areas was under a tense situation; besides, the lack of water for hydropower stations led to a year-on-year decline in hydropower on-grid power, while thermal power units played a supportive and protective role, with a larger increase in thermal power on-grid power on a quarter-on-quarter basis, which narrowed the decline of the total on-grid power in the first three quarters.
2. The Company continued to promote green and low-carbon development. In the first three quarters, the installed scale and utilization hours of wind power plants and photovoltaic plants continued to grow, resulting in a significant increase in on-grid power generation compared with the same period last year.

As of 30 September 2022, the average on-grid tariff of the Company was RMB459.43 per MWh (tax inclusive), representing an increase of 20.73% year-on-year. In the first three quarters of 2022, the market-based transaction volume of electricity of the Company was approximately 157.0 billion kWh, accounted for approximately 84.35% of the total.

Details of the on-grid power generation of the Company and its subsidiaries are set out as below:

Area	Category	Company name	On-grid power generation for the first three quarters of 2022 (billion kWh)	Year-on-year change
Beijing, Tianjin & Tangshan	Gas-fired	Beijing Gao Jing Thermal Power Branch of Datang International Power Generation Co., Ltd.	4.1075	-5.85%
	Coal-fired	Dou He Power Branch of Datang International Power Generation Co., Ltd.	0.9200	-38.29%
	Coal-fired	Xia Hua Yuan Power Branch of Datang International Power Generation Co., Ltd.	0.5292	1.57%
	Coal-fired	Zhang Jia Kou Power Branch of Datang International Power Generation Co., Ltd.	7.9507	8.07%
	Coal-fired, Photovoltaic Power	Tianjin Datang International Panshan Power Generation Company Limited	3.4343	2.87%
	Coal-fired	Inner Mongolia Datang International Tuoketuo Power Generation Company Limited	11.0590	0.47%
